

EMS Protocol Changes and/or Updates
Dr. Erin Burnham

Protocol Procedure or Drug Sheet:	Modification	EMT Levels Affected	Date Added / Updated
Hereditary Angioedema	New Protocol Written. Drug sheet for Ecalantide (Kalbitor) created. (Only expected to effect MCFR & Dufur paramedics)	Paramedic only	1/1/2015
Narcan for EMRs	Changed due to new law allowing laypersons to be trained to administer Narcan and OMB change in scope for EMRs. Changed in Narcan drug sheet to reflect EMR usage. Emphasized intranasal administration to avoid needlestick. Altered Mental Status Protocol edited to reflect change	All levels	1/1/2015
RSI	Move Fentanyl up before BZDs to emphasize importance of treating pain and sedation prior to repeat dose of paralytics	Paramedic only	1/1/2015
Sepsis - Adult	New Sepsis Protocol Written	All levels	1/1/2015
Sepsis - Peds	New Pediatric Sepsis Protocol Written	All levels	1/1/2015
Ebola	New procedure written to address EMS preparedness for Ebola or other high risk infectious disease.	All levels	1/1/2015
